Tabletop Collection

by sharif pendleton

interior geometry

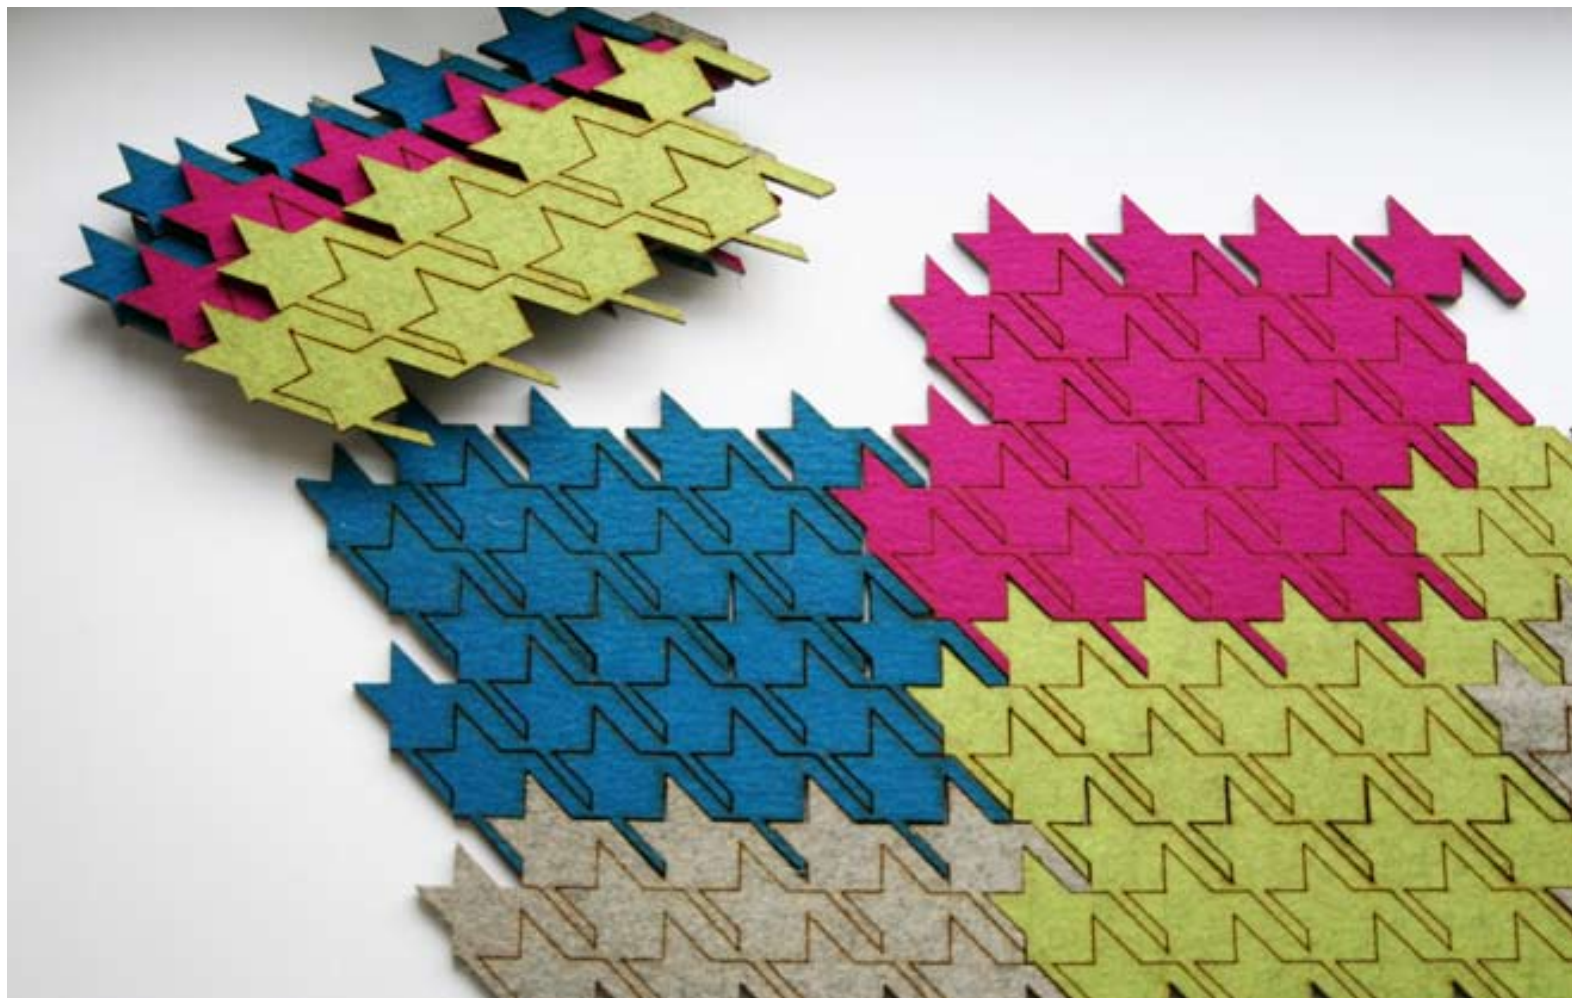

a collection of table-top necessities for those who create, remake, and take apart.

each piece lovingly hand made by **masters of none.**

candle cubes

a pair of buildable candle holders that go from tea light to taper-sized, colored wool felt to mirrored acrylic and back again. these exciting little guys are three items in one.

table tiles

the pattern of the houndstooth on these wool felt table tiles allows the individual pieces to interlock so you can make a trivet for your tea pot, a placemat, or a colorful table runner. this is what happens when form and function make a baby.

soak salver

a set of four patterned salvers protect your table-top from water rings in style. preppy patterns like plaid, argyle, houndstooth, and geometric repeats are laser-cut into bamboo that's been treated to look better with age. makes matching your socks a breeze.
